True Hive with New Square combined

# The True Hive Collection

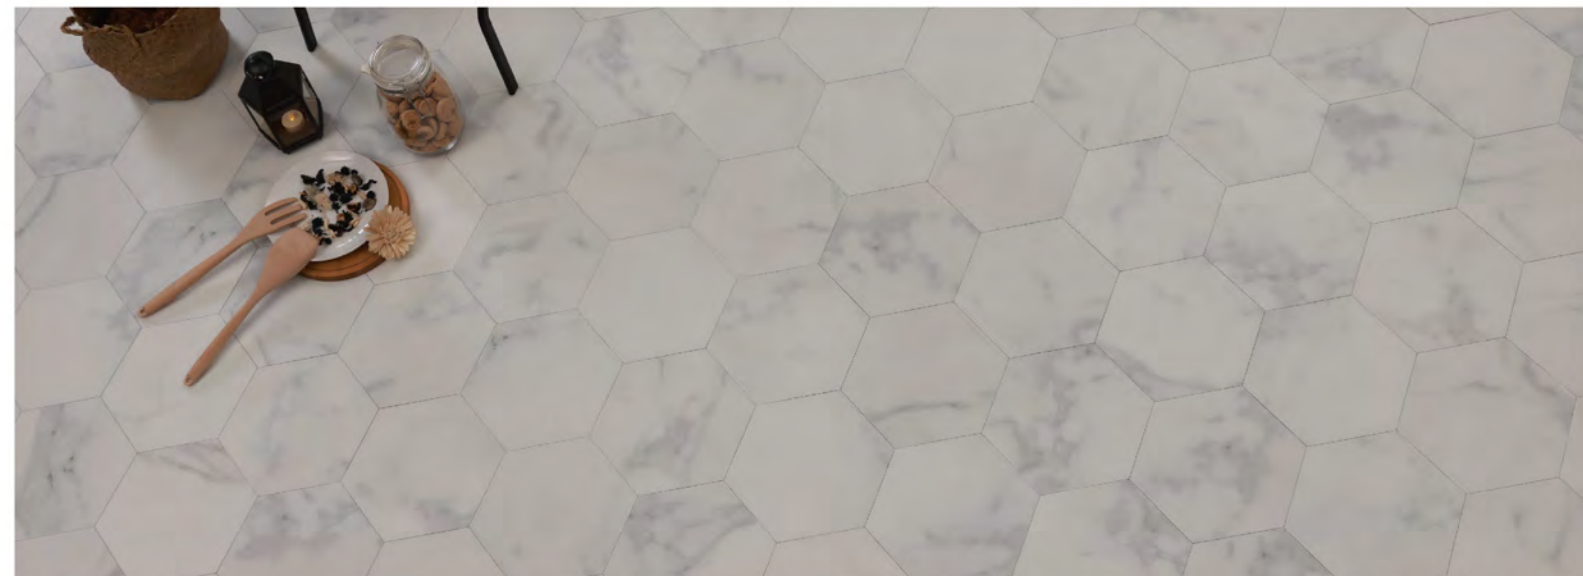

With the combination of interior design and natural elements, the importance of the home and nature atmosphere has become more relevant.

Nowadays, there is a prevailing human need to bring as much nature as possible indoors. This has shaped the trend of biophilic design, as construction and decoration now integrates natural lighting, ventilation, plants and natural materials, such as wood, stone and marble, in the indoor decoration projects. The type of design improves mood, health and wellness, resulting in increased productivity and reduced stress levels, therefore, the trend we injected to new natural element, such as flowers, leaves, stars, honeycomb-like hexagons, or seashells.

The concept of the True Hive Collection was based on hexagon honeycomb which represented the natural bee-hive and the geometric elegance.

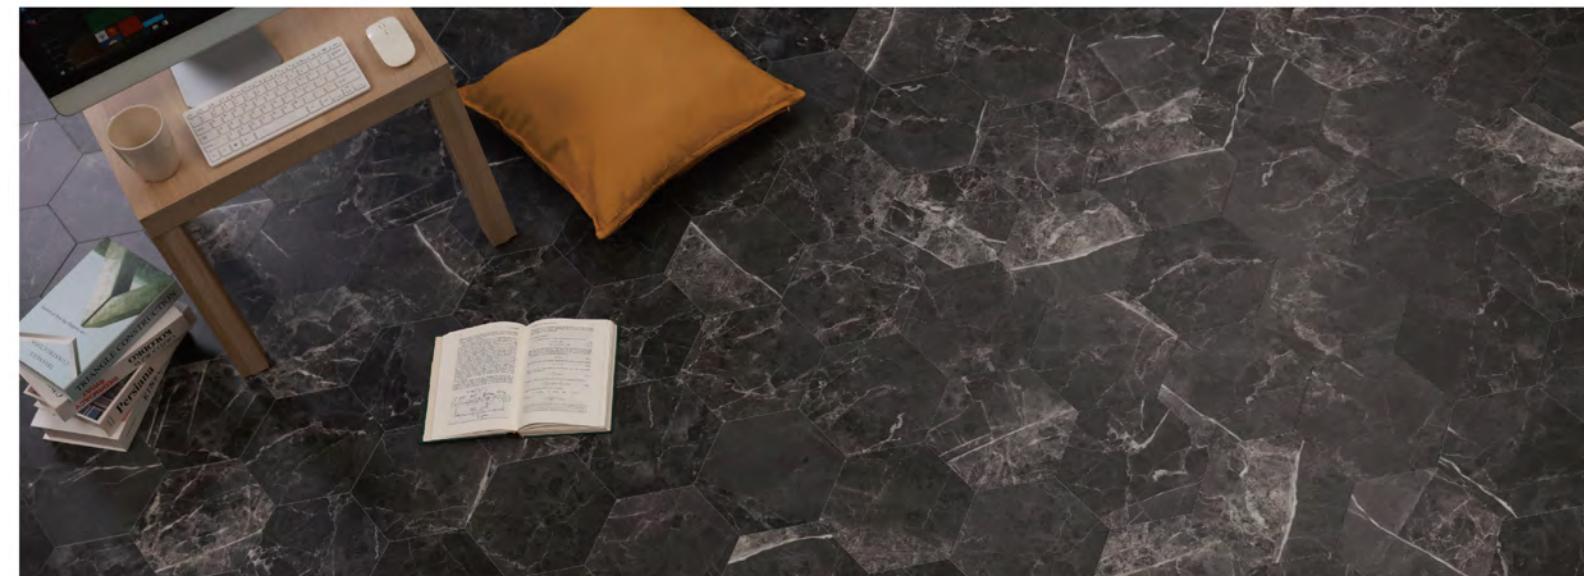

The attractive 6 designs are giving an opportunity to fulfil your individual needs and inspiration, no matter what you are looking for a beautiful smooth appearance, a trendy marble look or a botanic touch in your interior design. To combine the different designs, e.g. the concrete together with the botanic designs, even creates an astounding subtle and attractive floor being a valuable asset and contribution to your whole interior design !
